CHECKLIST

Opened Wine Storage Checklist

- [ ] Re-seal the bottle immediately after pouring
- [ ] Place it in the fridge, even if it's red wine
- [ ] Use a vacuum pump or inert gas for storage beyond a day
- [ ] Transfer remaining wine into a smaller container if less than half remains
- [ ] Check the wine's aroma before serving—flat or sharp smells mean it has oxidised
- [ ] Let refrigerated red wine warm for fifteen to twenty minutes before pouring
